PROFESSIONAL SUMMARY

Cloud Platform and DevOps Engineer with 3+ years of hands-on experience designing, building, and operating AWS-based, containerized platforms using Infrastructure-as-Code, CI/CD automation, and Kubernetes (EKS). Proven track record in production support, incident management, resiliency engineering, and full-stack observability for mission-critical, high-scale payment systems. Experienced in deploying and managing Kubernetes workloads for GenAI applications, including IAM role configuration, IRSA (IAM Roles for Service Accounts), trust policy setup, and Helm chart development. Adept at improving availability, security, and operational efficiency in regulated environments.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, RDS, EKS, CloudWatch), GCP

Containers & Orchestration: Docker, Kubernetes, EKS, GKE, RKE2, Rancher, Helm

CI/CD & GitOps: Jenkins, GitLab CI/CD, GitHub Actions, Argo CD

Infrastructure as Code: Terraform, Ansible, Helm

Monitoring & Observability: Prometheus, Grafana, OpenTelemetry (OTEL), Victoria Metrics, EFK Stack, CloudWatch, Alertmanager

Databases, Caching & Streaming: PostgreSQL, Yugabyte, Redis, Kafka

Load Balancing & Proxy: Nginx, HAProxy

Security & IAM: AWS IAM, Trust Policies, IRSA (IAM Roles for Service Accounts), Kubernetes ServiceAccounts, RBAC

AI/ML Platform Support: Amazon Bedrock (model access provisioning), LangFuse (LLM observability & tracing), Amazon SageMaker

EXPERIENCE

Senior Associate – DevOps Engineer | **National Payments Corporation of India (NPCI)** | Hyderabad | Jul 2022 – Present

- **AWS infrastructure** (EC2, S3, RDS, IAM, VPC, EKS, CloudWatch) using Terraform and Helm, ensuring platform consistency, security, and self-service adoption.
- **Kubernetes (EKS) workloads**, configuring HPA autoscaling, ingress controllers, liveness/readiness probes, and resource limits to maximize resiliency and performance.
- **GitOps-based CI/CD pipelines** using Argo CD, Jenkins, GitLab CI/CD, and GitHub Actions, enabling safe, repeatable multi-environment deployments with blue-green, rolling, and canary strategies.
- **IAM roles, trust policies, and Kubernetes ServiceAccounts (IRSA)** to securely grant workloads access to AWS services, resolving complex EKS permission issues for production applications.
- **observability platform** using OpenTelemetry, Prometheus, Grafana, Victoria Metrics, CloudWatch, and EFK stack, delivering full-stack visibility across distributed systems.
- **L2/L3 production support** for cloud and Kubernetes platforms — diagnosing application, infrastructure, and network issues to minimize downtime and reduce MTTR.
- **incident response, root cause analysis (RCA)**, and post-incident reviews, driving process improvements to strengthen platform reliability.

- **disaster recovery site switchovers**, reducing planned recovery time to 5 minutes and disaster failover to 10 minutes across Yugabyte databases, applications, and infrastructure.
- Analyze upcoming platform changes prior to release and communicate impact, mitigations, and rollout plans to stakeholders.
- **resiliency testing, failover drills**, and game-day exercises to validate platform readiness.

KEY PROJECTS

GenAI Application Deployment on Kubernetes (EKS)

- **Amazon Bedrock model access** (Anthropic Claude Sonnet and Haiku) via AWS Marketplace subscription, enabling developers to use LLM APIs within the organization.
- **long-lived API keys in LangFuse** to capture and observe LLM traces, enabling teams to monitor model calls, latency, and token usage across the GenAI chatbot.
- **Helm charts** to package and deploy developer-built GenAI chatbot applications onto EKS, standardizing deployment configurations across environments.
- **EKS IAM permission errors** by configuring trust policies, IAM roles, and Kubernetes ServiceAccounts using IRSA, enabling pods to securely call AWS services such as Bedrock without hardcoded credentials.
- Collaborated with development teams to ensure Kubernetes manifests, environment configs, and secrets management met security and operational standards.

Observability Platform – OpenTelemetry, Victoria Metrics, Grafana & EFK

- **metrics, logs, and traces** from distributed applications using OpenTelemetry collectors and exporters.
- Integrated node exporters, Grafana dashboards, Alertmanager workflows, and Elasticsearch log indexing for real-time operational visibility.
- Enabled insights into latency, error budgets, throughput, cache hit rates, DB query performance, and resource utilization.

CI/CD & Disaster Recovery Automation

- Designed multi-environment CI/CD pipelines (Jenkins, GitLab, Argo CD) supporting blue-green, rolling, and canary deployments for critical payment systems.
- Automated DR site switchovers, reducing planned recovery time to 5 minutes and unplanned failover to 10 minutes, coordinating across Yugabyte, applications, and infrastructure.
- Integrated DR validation, artifact promotion (Nexus), and config management (Ansible/Terraform/Helm) for consistent failover and rollback.

Cloud Monitoring & Incident Automation

- Built internal monitoring dashboards and alerting workflows using Alertmanager, Grafana, and scripted health checks to proactively surface and address issues.
- Automated routine environment checks and ticket actions, improving incident response times and reducing manual toil.

Feature Flags & Error Monitoring

- Led deployment of open-source Flagsmith (Kubernetes, Crunchy Postgres) for real-time feature management, reducing release risk and manual intervention.
- Deployed self-hosted Sentry via Helm on Kubernetes for crash reporting, release tracking, and automated alert and email notification workflows.

EDUCATION

B.Tech – Mechanical Engineering

Nadimpalli Satyanarayana Raju Institute of Technology (NSRIT) | Visakhapatnam, AP | Jun 2019 – Jun 2022

CERTIFICATIONS & AWARDS

- Advanced Certification in DevOps Automation — Carnegie Mellon University (via TalentSprint) | Dec 2022 – May 2023
- Kubernetes and Cloud Native Associate (KCNA) — CertID: LF-9vIrij1awu
- Associate Google Cloud Certified — CertID: 42571a4081f14fd799980c332ba3975a
- Well Done Award – National Payments Corporation of India | 11 Sep 2024 & 25 May 2026
- Ninja & Wizard Awards – 2025 Playground Challenges
